

Clear2there Cloud Video Surveillance

Protect your business the smart way with cloud-enhanced video surveillance.
Stored in the cloud – simple, cost-effective and reliable!

The safety of employees, customers and property is of the utmost importance to business owners. A video surveillance system provides an excellent means of monitoring and protecting these valuable assets. Clear2there's unique technology and reliability have made it easier than ever for any organization to leverage the many benefits of video surveillance across their business operations.

No servers or software to install and manage!

Clear2there's cloud-enhanced video surveillance platform records and stores video in the cloud, eliminating the need for on-premises servers. With no servers or software to install and manage, any business can quickly and easily deploy an enterprise-class video surveillance system. Our cloud-based video surveillance model reduces the need for IT involvement by automating all software updates and maintenance. For an affordable annual service charge, we provide your cloud service, support, updates, camera licensing and cloud video storage.

CLEAR2THERE VIDEO SURVEILLANCE SYSTEM ADVANTAGES

Video surveillance systems from other solution providers often require a user to download and watch large sections of video to find a specific incident of interest. Additionally, sharing the video may require copying to a separate file and emailing it as an attachment or saving it to a DVD. Clear2there's remote monitoring capabilities enable video to be viewed from any location, at any time of the day or night over a smartphone, tablet, or computer. Our intuitive web-based interface is remarkably easy to use and doesn't require installation of any software. Via a unique touch-enabled snapshot timeline, you can quickly locate video for a specific event, and then easily review, archive and share that video with others as needed.

With a focus on interconnectivity, the Clear2there Viewbiquity Cloud Application Suite (VCAS) can fully integrate your video surveillance system with a broad mix of other Clear2there best-of-breed systems and components, including access controls, HVAC, lighting, intrusion and security, environmental, energy management and more. Via the Clear2there VCAS platform, you can:

- **Easy-to-use web interface:** Manage and review your video surveillance systems via our easy-to-use web interface, which can be accessed directly from any internet-connected smartphone, tablet, desktop PC or other device.
- **Intelligent automation and management:** Create and edit customized schedules and automation rules that enable intelligent business management.
- **Automated notifications:** Receive real-time alerts via email, text message and even text-to-voice phone calls informing you of activity within your business.

Key Solution Benefits

- **Flexible Monthly Plans:** Select a flexible and convenient subscription plan option offering 30, 60 or 90 days of cloud video storage, all in stunningly clear high definition resolution.
- **Leading Video Technology:** Deploy select Clear2there bullet or mini-dome camera models, which deliver exceptional compression and noise reduction performance for better picture quality and superior bandwidth efficiency.
- **Nothing to Manage:** Eliminate the need for on-site video management and storage, which minimizes your initial investment as well as your ongoing maintenance costs.
- **Security and Reliability of the Cloud:** Store your video safely on enterprise-grade hardware in highly secure, state-of-the-art data center facilities that comply with the most rigorous industry security standards.
